Definitions

Misfeasance is the act of doing something which one should not do or which one is prohibited from doing by a legal or moral obligation, with an intention to do wrong.

Negligence is the unintended, accidental errors, mistakes taken place while managing the business, office or other responsibilities entrusted on a person, causing loss or damage or unfortunate situations out of such mistakes. A misfeasance becomes a negligence when the act was performed with an intention to cause loss.

Nonfeasance is failure or refusal to perform a task that ought to be performed. It is different from "misfeasance" meaning improper performance or "malfeasance" meaning illegal or misconduct of performance.

Per our bylaws nonfeasance is what we would want per these definitions

3 year doesn't specify if staggered or not
